AI Engineer – AI Agents, Automation and Systems Integration

AI Engineer (UAE resident) with 4+ years shipping production platforms, including nearly 3 years integrating LLMs into a 5M+ user product. Builds AI agents, automations and API integrations for e-commerce and business systems.

Skills

AI and Generative AI: OpenAI, Claude and Gemini APIs | AI Agents and Tool Calling | LangChain | LangGraph | Retrieval-Augmented Generation (RAG) | Embeddings and Vector Databases | Prompt Engineering
Automation and Integration: n8n | Make | Zapier | REST and GraphQL APIs | Webhooks | Shopify Admin API | GA4
Languages and Databases: Python | TypeScript | JavaScript | SQL | PostgreSQL | MongoDB | Prisma | Redis
Frameworks: Node.js | Express.js | Next.js | React | Vue | Tailwind CSS | Jest | Playwright
Platforms and Cloud: Shopify | Intershop | FirstSpirit | Amazon Web Services (AWS) | Docker | CI/CD | GitHub

Work Experience

Würth Professional Solutions, Dubai, UAE | Full-Stack AI Engineer 09/2025 – Present

- **AI automation:** Build LLM, n8n and Make automations that cut manual work in internal IT workflows.
- **AI insights:** Turn lead-performance and user-experience data into AI-driven reports for management.
- **Marketing and platforms:** Personalise Inxmail campaigns with AI; maintain Intershop and FirstSpirit sites.

Araby.ai, Abu Dhabi, UAE | Full-Stack Developer (AI Platform) 12/2022 – 09/2025

- **Scale:** Grew an AI content platform to 5M+ users in one year with Next.js, React and TypeScript.
- **LLM features:** Shipped LLM chatbots and AI assistants, from prompt design to Node.js and MongoDB APIs.
- **Performance:** Made the platform 35% faster with code-splitting, lazy loading and caching.
- **Cloud and payments:** Ran AWS (EC2, S3, CloudFront) with CI/CD; added Stripe, Amazon Pay and Coinbase.
- **Leadership:** Worked directly with C-level leadership and mentored junior developers through code reviews.

ZL Technovation, Ontario, Canada (Remote) | Frontend Developer 10/2021 – 12/2022

- **Frontend:** Built scalable React components and sped up load times using Chrome DevTools profiling.

Education

Visvesvaraya Technological University, India | B.E. Computer Science and Engineering 2022

Projects

AI Agents for E-Commerce Automation Python | LangGraph | LangChain | n8n | Shopify Admin API

- Run 4 production AI agents (image, listing, pricing, marketing) for 2 clients, replacing manual work.
- Agents set prices and publish SEO listings through store APIs, with n8n handling triggers and approvals.

AI Commerce Management System (Architecture) Node.js | TypeScript | PostgreSQL | Redis | Claude API

- Architected a 10-module operations platform scoped at 1,220 hours across 4 workstreams and 12 weeks.
- Designed safe AI automation: a rules engine validates, approves and logs every AI-proposed change.
- Added landed-cost pricing, supplier scoring, stock alerts and a KPI dashboard with daily exceptions.

Duscent Catalogue and Search Data Audit duscent.ae

- Crawled 34,000+ competitor pages, matched 534 listings and flagged 605 missing barcodes.
- Built a title and Merchant feed generator lifting brand-first Google titles from 23 to 674 of 695.

Other Client Work

- B-Seen maps (Google Maps API, Vue) | Emirates Red Crescent payments (Stripe, Apple Pay, Tabby) | Zat Al-Emad Group corporate site | Aurasia Shopify redesign | Virtual currency wallet

Awards and Certifications

2025 | Gold Sponsorship Coordinator, Würth Professional Solutions | Big 5 Global
2024 | Exhibitor and Live-Demo Presenter, Araby.ai | Seamless Middle East
Certifications: Google UX Design Professional Certificate | The Web Developer Bootcamp 2023
